

## Intel Report #20190221\_220448

*Date:*

2019-02-21 22:04:48

*Description:*

On 2019-02-21, a ransomware attack was perpetrated against a company named PALMA MERCURY INTERNATIONAL located in the country of Maelallaza. The attacker used the tool, Quasar Rat, during its attack. It is believed the attack was an unsuccessful attempt to display military prowess, and one of the indicators discovered was the IPv4 address, 6.156.143.4.
